## FGISonline

### ▶ FGIS Certificates (CRT & DCRT)

- ▶ CRT users have been instructed to install the distributed version (DCRT) and create at least one certificate with it to ensure it is available as a back-up if the FGISonline server is unavailable or there is an interruption in internet service.
- ▶ The CRT stand-alone version should no longer be used.

## ***FGISonline***

### ▶ **FGIS Official Service Provider Licensing (FOL)**

- ▶ FOL was released on March 1, 2010.
- ▶ All official agencies should now use it for their licensing activities.
- ▶ High-priority issues are being addressed in new version (1.0.6).
- ▶ On-line demo is available upon request. Contact Susan Fall to schedule.

*AAGWA Meeting  
April 27, 2010*

## ***FGISonline***

### ▶ **Quality Assurance and Control (QAC)**

- ▶ QAC was released on March 1, 2010, for use by only those official agencies assigned to the Field Operations and Support Staff (FOSS).
- ▶ An enhancement is in the queue to make it accessible to all service providers.
- ▶ Requirements for approximately 25 reports have been submitted to GIPSA's IT staff.

*AAGWA Meeting  
April 27, 2010*

## ***FGISonline***

### **▶ Inspection Testing & Weighing (ITW & DITW)**

- ▶ ITW migrated to the production server on April 17, 2010
- ▶ Recommend using distributed version (DITW) for shiplot Cusum inspections
- ▶ The application will initially be implemented at one export port elevator at a time to ensure a smooth transition for shiplot inspections from the current Cusum application.
- ▶ Further testing will occur before ITW is released for rail Cusum inspections.

AAGIWA Meeting  
April 27, 2010

## ***FGISonline***

### **▶ Organization & Personnel (OPA)**

- ▶ Contact Vicki Lacefield/Erik Mojica ASAP to have a service point number assigned to a new on-site inspection or weighing facility.

AAGIWA Meeting  
April 27, 2010

## ***FGISonline***

### **▶ Reports**

- ▶ GIPSA's IT staff has a new member who will facilitate the creation of reports through a new on-demand reporting function. Users will be able to select the fields and output format to tailor reports for their individual needs. The projected timeframe for developing this reporting function is 6 – 8 months.

*AAGWA Meeting  
April 27, 2010*

## ***FGISonline***

### **▶ Issues**

- ▶ Bad data
- ▶ Time lag between Date of Service and Cert Date on some records
- ▶ Renewal of licenses not timely
- ▶ POC information not updated in DDR
- ▶ eAuthentication email addresses (personal vs work)
- ▶ *FGISonline* server not available (USDA/GIPSA maintenance, migrations, environmental issues, unexplained failures)

*AAGWA Meeting  
April 27, 2010*
